SKILLS

Languages: C/C++, JavaScript, SQL, PHP, Swift, HTML, CSS/SASS

Libraries & Frameworks: Node.js, Express.js, React.js, Unity

Technologies & Tools: Git, Bash, Firebase, MySQL, WordPress

EXPERIENCE

CTRL V SOFTWARE DEVELOPER

Winter 2019 | Waterloo, ON

- Created the [Account Ctrl](#) web app and a customer account API using [Node](#), [React](#), and [PostgreSQL](#), allowing over **14,000** customers to view gameplay data and update waivers
- Built an email scheduler using [Nodemailer](#) and Pug.js, reducing time taken to personalize emails sent to customers by over **30%** by automating the process via templates
- Developed a [Unity](#) program in C# leveraging the [Photon](#) engine, allowing in-game voice communication between players

SIMPLISTICS WEB DEVELOPER

Summer 2018 | Kitchener, ON

- Created [PHP](#) frontend partials styled with SASS to be used on a variety of [WordPress](#) sites
- Built a Gift Card plugin and interface using the [WooCommerce](#) API, generating over **\$1000** on an Ecommerce website in the first month it was active
- Created a User Management plugin using the [Slack](#) and [Mailchimp](#) API's, to support communications between over **1500** users on the front and backend of a social platform
- Designed and implemented a [MySQL](#) database schema and admin panel for a web app which organized the relationships between wards, officers, and schools in Toronto

CITY OF BROCKVILLE GIS DEVELOPER

Summer 2017 | Brockville, ON

- Converted [AutoCAD](#) drawings to GIS format involving data format conversion, and geometry verification
- Used [ArcMap](#) and ArcGIS Online as data visualization tools to create maps and web map applications such as [St. Lawrence Park](#), and [Outdoor Brockville](#)
- Wrote a [Bash](#) script which ran as a cron job to automate the process of backing up GIS data

PROJECTS

QUICK CODE NODE.JS, REACT.JS, PYTHON, AZURE

- Created a Web IDE which converted spoken pseudo code into JavaScript leveraging [Microsoft Azure's](#) web and cognitive services
- Won the [Best Voice Biometrics Hack](#) and the Wolfram Award at nwHacks 2019

ORB GAME LUA, BOX2D

- Created an orb launching game using [Lua](#) with the Gideros mobile environment.
- Used the [Box2D](#) engine to implement the physics and collision logic

EDUCATION

UNIVERSITY OF WATERLOO BACHELOR OF COMPUTER SCIENCE

September 2016 - April 2021 | President's Scholarship

Relevant Courses: Algorithms, Operating Systems ([C](#)), Numerical Computation ([Matlab](#))
Computer Simulation ([R](#)), Object-Oriented Software Development ([C++](#))
